

We live in an era of constantly accelerating scientific and social change brought about by developments in education, technology and modern communication. This is a time of questioning and new perceptions affecting all facets of our daily lives. With increasing frequency issues are being raised which demand answers and new approaches. This increases the responsibility of those involved in determining the future shape of the world of coffee. The dependence of developing countries on income generated from trade in coffee, the emergence of new processing techniques, health implications and questions of quality of coffee in the cup are among the issues related to coffee. The knowledge required to form the basis to resolve these issues for the benefit of the multitudes of coffee drinkers will be generated only through the systematic build up of information and its subsequent evaluation. Science and modern technology provide essential tools for these endeavours. This book should act as a stimulant to thought and creativity so the issues facing the industry may be fully analysed and a healthy future for coffee secured. It marks a step forward in laying the foundation for coffee's future. Alexandre F. Beltrao Executive Director International Coffee Organisation London

PREFACE

We have long been fascinated by coffee and on many occasions bemoaned the lack of a comprehensive text dealing with the varied scientific aspects. With the encouragement of Tim Hardwick of Croom Helm Ltd, we decided to pool our resources and produce just such a multi-author volume.

Nonsense Novels, Crow Call, Wiersbe Bible Commentary NT (Wiersbe Bible Commentaries), 70% Contracts Law Essays - style and technique (e borrowing also allowed): e book, Beyond the East-West Divide: The World Council of Churches and the Orthodox Problem-#95 (Risk Book Series), Sleeping with the Devil: How Washington Sold Its Soul for Saudi Crude, The Christ Clone Trilogy - Book Two: BIRTH OF AN AGE (Revised & Expanded),
